L'obiettivo principale di quest'opera è quello di fornire gli elementi più significativi di aspetti clinici e di problematiche inerenti la medicina perioperatoria, la terapia intensiva e l'emergenza, tutti elementi che costituiscono il nucleo centrale nell'ambito della Medicina per acuti. Il volume è diviso in sette parti, ciascuna delle quali è indipendente dalle altre sebbene un unico filo conduttore venga mantenuto; tale caratteristica è il frutto della fattiva e crescente collaborazione tra diverse Scuole di Specializzazione in Anestesia e Rianimazione del nostro paese - anche attraverso la loro interazione con personale medico altamente specializzato proveniente da diverse strutture di riferimento - con l'intento di migliorare gli standard della formazione specialistica. Grande rilievo viene dato al monitoraggio della funzione respiratoria e alle nuove tecniche di ventilazione artificiale, con particolare riferimento all'uso originale della ventilazione percussiva ad alta frequenza (VPAF). Nella seconda parte del volume vengono tra l'altro offerti dagli Autori importanti aggiornamenti sull'importanza di un attento monitoraggio clinico e strumentale del paziente postoperatorio, nonché delle tecniche di trattamento del dolore postoperatorio. I capitoli finali sono dedicati all'epidemiologia delle infezioni, alla prevenzione e al trattamento delle stesse, e all'efficacia della decontaminazione selettiva del tratto digerente.
