An history of the earth: and animated nature: by Oliver Goldsmith. In eight volumes. ... [pt.1] Oliver Goldsmith

"NATURAL HISTORY, considered in its utmost extent, comprehends two objects. First, that of discovering, ascertaining, and naming all the various productions of nature. Secondly, that of describing the properties, manners, and relations, which they bear to us, and to each other. The first, which is the most difficult part of this science, is systematical, dry, mechanical, and incomplete. The second is more amusing, exhibits new pictures to the imagination, and improves our relish for existence, by widening the prospect of nature around us.

This is an edition of a classical book first published in the eighteenth century.
