GIS for Environmental Decision-Making (Innovations in GIS)

GIS for Environmental Decision-Making (Innovations in GIS)

Environmental applications have long been a core use of GIS. However, the effectiveness of GIS-based methods depends on the decision-making frameworks and contexts within which they are employed. GIS for Environmental Decision-Making takes an interdisciplinary look at the capacities of GIS to integrate, analyze, and display data on which decisions must be based. It provides a broad perspective on the current state of GIS for environmental decision-making and emphasizes the importance of matters related to data, analysis, and modeling tools, as well as stakeholder participation.

The book is divided into three sections, which effectively relate to three key aspects of the decision-making process as supported by GIS: data required, tools being developed, and aspects of participation. The first section stresses the ability to integrate data from different sources as a defining characteristic of GIS and illustrates the benefits that this can bring in the context of deriving land-use and other information. The second section discusses a range of issues concerning the use of GIS for suitability mapping and strategic planning exercises, through illustrative examples. The last section of the book focuses on the use of GIS-based techniques to facilitate public participation in decision-making processes. In particular, it provides an overview of developments in this area, concentrating on how GIS, modeling, and 3D landscape visualization techniques are gradually achieving closer integration.

Given the complex challenges presented by global environmental change, GIS for Environmental Decision-Making provides a clear illustration of how the use of GIS can make significant contributions to trans-disciplinary initiatives to address environmental problems.

From reader reviews:

Jeffrey Evans:

With other case, little people like to read book GIS for Environmental Decision-Making (Innovations in GIS). You can choose the best book if you love reading a book. So long as we know about how is important the book GIS for Environmental Decision-Making (Innovations in GIS). You can add understanding and of course you can around the world with a book. Absolutely right, since from book you can learn everything! From your country right up until foreign or abroad you will find yourself known. About simple point until wonderful thing it is possible to know that. In this era, we can open a book or even searching by internet device. It is called e-book. You can use it when you feel bored stiff to go to the library. Let's learn.

Elizabeth Hart:

Many people spending their time period by playing outside using friends, fun activity along with family or just watching TV all day every day. You can have new activity to enjoy your whole day by examining a book. Ugh, ya think reading a book can actually hard because you have to take the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Smartphone. Like GIS for Environmental Decision-Making (Innovations in GIS) which is keeping the e-book version. So , try out this book? Let's view.

Christopher Burnham:

Is it anyone who having spare time subsequently spend it whole day by watching television programs or just telling lies on the bed? Do you need something new? This GIS for Environmental Decision-Making (Innovations in GIS) can be the reply, oh how comes? A fresh book you know. You are consequently out of date, spending your spare time by reading in this completely new era is common not a geek activity. So what these textbooks have than the others?

Virgie Haynes:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or to make summary for some guide, they are complained. Just very little students that has reading's heart and soul or real their interest. They just do what the instructor want, like asked to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this GIS for Environmental Decision-Making (Innovations in GIS) can make you feel more interested to read.
