**NEHRP Recommended Seismic Provisions for New Buildings and Other Structures (FEMA P-750 / 2009 Edition)** Federal Emergency Management Agency, U. S. Department of Homeland Security, Building Seismic Safety Council, National Earthquake Hazards Reduction Program

One of the goals of the Federal Emergency Management Agency (FEMA) and the National Earthquake Hazards Reduction Program (NEHRP) is to encourage design and building practices that address the earthquake hazard and minimize the resulting risk of damage and injury. Publication of the 2009 edition of the NEHRP Recommended Seismic Provisions for New Buildings and Other Structures (FEMA P-750) reaffirms FEMA's ongoing support of efforts to achieve this goal. First published in 1985, the 2009 edition of the Provisions marks the seventh in a series of updates to the document and several complementary publications. FEMA is proud to have sponsored this project conducted by the Building Seismic Safety Council (BSSC) of National Institute of Building Sciences (NIBS) and continues to encourage the widespread dissemination and voluntary use of this state-of-art consensus resource document. In contrast to the earlier editions of the Provisions which resulted from three-year update projects, the 2009 edition is the first resulting from a five-year update effort that allowed the BSSC's Provisions Update Committee (PUC) to make some major changes in both the substance and the format of the Provisions document. The most significant change involves the adoption by reference of the national consensus design loads standard, ASCE/SEI 7-05, Minimum Design Loads for Buildings and Other Structures, including the related consensus standards referenced therein and Supplements 1 and 2. Part 1 of this document includes consensus-approved modifications of the seismic requirements in the standard. Among these modifications is the adoption of new seismic design maps based on seismic hazard maps issued in 2008 by the U.S. Geological Survey (USGS) along with some design-related adjustments. Another major change has been made to the accompanying Commentary, previously issued as a separate volume but now included as Part 2 of the 2009 Provisions. The content of the Commentary has been completely rewritten to provide users with an up-to-date, user friendly explanation of how to design using the Provisions and the reference standard. Part 3 of the 2009 Provisions consists of a series of resource papers intended to clarify aspects of the Provisions, stimulate consideration of and feedback from the design community on new seismic design concepts and procedures, and/or encourage the development and adoption of new requirements in ASCE/SEI 7 and the standards referenced therein. Thus, the 2009 Provisions serves as a national resource intended for use by both design professionals and the standards- and codes-development community in fostering development of a built environment designed and constructed to protect building occupants from loss of life and serious injury and to reduce the total losses from future earthquakes.

**From reader reviews:**

**Michael Cardona:**

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each publication has different aim or even goal; it means that e-book has different type. Some people sense enjoy to spend their time to read a book. These are reading whatever they get because their hobby is usually reading a book. Why not the person who don't like examining a book? Sometime, particular person feel need book whenever they found difficult problem or exercise. Well, probably you will want this NEHRP Recommended Seismic Provisions for New Buildings and Other Structures (FEMA P-750 / 2009 Edition).

**Betty Giuliani:**

Book is to be different for each and every grade. Book for children until finally adult are different content. We all know that that book is very important for all of us. The book NEHRP Recommended Seismic Provisions for New Buildings and Other Structures (FEMA P-750 / 2009 Edition) had been making you to know about other understanding and of course you can take more information. It is very advantages for you. The book NEHRP Recommended Seismic Provisions for New Buildings and Other Structures (FEMA P-750 / 2009 Edition) is not only giving you a lot more new information but also to get your friend when you feel bored. You can spend your spend time to read your reserve. Try to make relationship with the book NEHRP Recommended Seismic Provisions for New Buildings and Other Structures (FEMA P-750 / 2009 Edition). You never truly feel lose out for everything in case you read some books.

**Bill Dildy:**

Can you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you never know the inside because don't assess book by its protect may doesn't work the following is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside search likes. Maybe you answer may be NEHRP Recommended Seismic Provisions for New Buildings and Other Structures (FEMA P-750 / 2009 Edition) why because the fantastic cover that make you consider in regards to the content will not disappoint you. The inside or content is fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

**Donald Shelton:**

With this era which is the greater particular person or who has ability in doing something more are more valuable than other. Do you want to become among it? It is just simple strategy to have that. What you need to do is just spending your time very little but quite enough to enjoy a look at some books. One of the books in the top list in your reading list is NEHRP Recommended Seismic Provisions for New Buildings and Other

Structures (FEMA P-750 / 2009 Edition). This book and that is qualified as The Hungry Inclines can get you closer in turning into precious person. By looking up and review this publication you can get many advantages.
