Analysis (Graduate Studies in Mathematics)

Elliott H. Lieb, Michael Loss

Analysis (Graduate Studies in Mathematics) Elliott H. Lieb, Michael Loss

Significantly revised and expanded, this new Second Edition provides readers at all levels---from beginning students to practicing analysts---with the basic concepts and standard tools necessary to solve problems of analysis, and how to apply these concepts to research in a variety of areas.

Authors Elliott Lieb and Michael Loss take you quickly from basic topics to methods that work successfully in mathematics and its applications. While omitting many usual typical textbook topics, Analysis includes all necessary definitions, proofs, explanations, examples, and exercises to bring the reader to an advanced level of understanding with a minimum of fuss, and, at the same time, doing so in a rigorous and pedagogical way. Many topics that are useful and important, but usually left to advanced monographs, are presented in Analysis, and these give the beginner a sense that the subject is alive and growing.

This new Second Edition incorporates numerous changes since the publication of the original 1997 edition and includes:

Features:

a new chapter on eigenvalues that covers the min-max principle, semi-classical approximation, coherent states, Lieb-Thirring inequalities, and more

extensive additions to chapters covering Sobolev Inequalities, including the Nash and Log Sobolev inequalities

new material on Measure and Integration

many new exercises

and much more ...

The Second Edition continues its no-nonsense approach to the topic that has made it one of the best selling books on the subject. It is an authoritative, straight-forward volume that readers---from the graduate student, to the professional mathematician, to the physicist or engineer using analytical methods---will find useful both as a reference and as a guide to real problem solving.

About the authors: Elliott Lieb is Professor of Mathematics and Physics at Princeton University and is a member of the US, Austrian, and Danish Academies of Science. He is also the recipient of several prizes including the 1988 AMS/SIAM Birkhoff Prize. Michael Loss is Professor of Mathematics at the Georgia Institute of Technology.

From reader reviews:

Bobbie Burke:

What do you ponder on book? It is just for students as they are still students or the idea for all people in the world, exactly what the best subject for that? Only you can be answered for that problem above. Every person has several personality and hobby for every single other. Don't to be compelled someone or something that they don't want do that. You must know how great along with important the book Analysis (Graduate Studies in Mathematics). All type of book could you see on many sources. You can look for the internet options or other social media.

Bernice King:

This book untitled Analysis (Graduate Studies in Mathematics) to be one of several books which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this kind of book in the book retailer or you can order it through online. The publisher of this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Touch screen phone. So there is no reason for you to past this publication from your list.

Nora Emerson:

Your reading sixth sense will not betray an individual, why because this Analysis (Graduate Studies in Mathematics) e-book written by well-known writer who really knows well how to make book that can be understand by anyone who read the book. Written with good manner for you, still dripping wet every ideas and writing skill only for eliminate your hunger then you still doubt Analysis (Graduate Studies in Mathematics) as good book not only by the cover but also by content. This is one e-book that can break don't ascertain book by its protect, so do you still needing yet another sixth sense to pick this specific!?! Oh come on your studying sixth sense already told you so why you have to listening to an additional sixth sense.

Travis Mahon:

That publication can make you to feel relax. This book Analysis (Graduate Studies in Mathematics) was multi-colored and of course has pictures on there. As we know that book Analysis (Graduate Studies in Mathematics) has many kinds or genre. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. So , not at all of book tend to be make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading that.
