11 September 1297: The Battle of Stirling Bridge, William Wallace's Greatest Victory Over The English DecisiveDays.com

The year is 1297 AD. Edward I of England and his troops are in control of Scotland, most of the Scottish nobility has surrendered, and the Scottish King John I is imprisoned in the tower of London. The freedom of Scotland seems to be at an end. However, two individuals are daring to challenge the will of the English king by leading rebellions in the north and south of Scotland.

The separate rebel armies of Andrew Murray and William Wallace then come together to siege an English garrison at Dundee where they receive word that the English are sending a fresh new force north to put down the rebellion. The English army will have to cross the narrow wooden bridge at Stirling and this gives the Scottish commanders the perfect opportunity for a trap. They hastily move their forces, a ragged bunch of Highland warriors, many of whom have no experience in combat, to the north shore of the River Forth to wait for the English to cross.

The English head into this situation unconcerned however, they have experienced troops who have fought in the Crusades and Wales, and they have heavy cavalry. The Scottish rabble will be no match for them...

Fate would bring an unexpected outcome however, and the Battle of Stirling Bridge on 11 September 1297, is remembered as one of the most amazing battles of medieval Europe.

Experience for yourself every important moment of the day as the events unfold, described in vivid detail, in this epic 5-part narrative.

Grab your copy now!

Bonus: The final chapter is a detailed account of the Scottish Claymore, a fearsome weapon wielded by Highland warriors with amazing effectiveness during this and many other medieval battles.
