Challenging Mathematical Problems With Elementary Solutions (Volume 2) A. M. Yaglom, I. M. Yaglom

Designed for advanced high school students, undergraduates, graduate students, mathematics teachers, and any lover of mathematical challenges, this two-volume set offers a broad spectrum of challenging problems — ranging from relatively simple to extremely difficult. Indeed, some rank among the finest achievements of outstanding mathematicians.

Translated from a well-known Russian work entitled *Non-Elementary Problems in an Elementary Exposition*, the chief aim of the book is to acquaint the readers with a variety of new mathematical facts, ideas, and methods. And while the majority of the problems represent questions in higher ("non-elementary") mathematics, most can be solved with elementary mathematics. In fact, for the most part, no knowledge of mathematics beyond a good high school course is required.

Volume One contains 100 problems, with detailed solutions, all dealing with probability theory and combinatorial analysis. Topics include the representation of integers as sums and products, combinatorial problems on the chessboard, geometric problems on combinatorial analysis, problems on the binomial coefficients, problems on computing probabilities, experiments with infinitely many possible outcomes, and experiments with a continuum of possible outcomes.

Volume Two contains 74 problems from various branches of mathematics, dealing with such topics as points and lines, lattices of points in the plane, topology, convex polygons, distribution of objects, nondecimal counting, theory of primes, and more. In both volumes the statements of the problems are given first, followed by a section giving complete solutions. Answers and hints are given at the end of the book.

Ideal as a text, for self-study, or as a working resource for a mathematics club, this wide-ranging compilation offers 174 carefully chosen problems that will test the mathematical acuity and problem-solving skills of almost any student, teacher, or mathematician.

From reader reviews:

Joel Fallis:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a e-book. Beside you can solve your trouble; you can add your knowledge by the e-book entitled Challenging Mathematical Problems With Elementary Solutions (Volume 2). Try to make the book Challenging Mathematical Problems With Elementary Solutions (Volume 2) as your friend. It means that it can to get your friend when you truly feel alone and beside that of course make you smarter than in the past. Yeah, it is very fortunated to suit your needs. The book makes you considerably more confidence because you can know every thing by the book. So , let me make new experience in addition to knowledge with this book.

Saul Robinson:

The book Challenging Mathematical Problems With Elementary Solutions (Volume 2) make you feel enjoy for your spare time. You should use to make your capable considerably more increase. Book can to be your best friend when you getting strain or having big problem together with your subject. If you can make examining a book Challenging Mathematical Problems With Elementary Solutions (Volume 2) for being your habit, you can get more advantages, like add your capable, increase your knowledge about several or all subjects. You are able to know everything if you like available and read a reserve Challenging Mathematical Problems With Elementary Solutions (Volume 2). Kinds of book are several. It means that, science publication or encyclopedia or some others. So , how do you think about this guide?

Michael Berry:

Reading a book tends to be new life style in this particular era globalization. With reading through you can get a lot of information that may give you benefit in your life. Together with book everyone in this world could share their idea. Books can also inspire a lot of people. A great deal of author can inspire all their reader with their story as well as their experience. Not only the storyline that share in the textbooks. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their skill in writing, they also doing some research before they write to the book. One of them is this Challenging Mathematical Problems With Elementary Solutions (Volume 2).

Arthur Freeman:

People live in this new moment of lifestyle always try and and must have the time or they will get wide range of stress from both day to day life and work. So , if we ask do people have extra time, we will say absolutely of course. People is human not really a robot. Then we ask again, what kind of activity do you have when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative within spending your spare time, the actual book you have read

is usually Challenging Mathematical Problems With Elementary Solutions (Volume 2).
