Physical Chemistry for Engineering and Applied Sciences

Frank R. Foulkes

Physical Chemistry for Engineering and Applied Sciences Frank R. Foulkes

Physical Chemistry for Engineering and Applied Sciences is the product of over 30 years of teaching first-year Physical Chemistry as part of the Faculty of Applied Science and Engineering at the University of Toronto. Designed to be as rigorous as compatible with a first-year student's ability to understand, the text presents detailed step-by-step derivations of the equations that permit the student to follow the underlying logic and, of equal importance, to appreciate any simplifying assumptions made or mathematical tricks employed.

In addition to the 600 exercises and end-of-chapter problems, the text is rich in worked non-trivial examples, many of which are designed to be inspiring and thought-provoking. Step-by-step derivation of all equations enables the student to smoothly follow the derivation by sight, and can be understood relatively easily by students with moderate skills and backgrounds in mathematics.

Clear and accessible, **Physical Chemistry for Engineering and Applied Sciences** includes:

- The answers to all of the 112 worked examples, 99 exercises following many of the worked examples, and 496 end-of-chapter problems
- Topics not normally seen in introductory physical chemistry textbooks (ionic reaction rates, activities and activity coefficients) or not regularly explained in much detail (electrochemistry, chemical kinetics), with an eye on industrial applications
- Special appendices that provide detailed explanations of basic integration and natural logarithms for students lacking a background in integral calculus
- An in-depth chapter on electrochemistry, in which activities and activity coefficients are used extensively, as required for accurate calculations

From reader reviews:

Rolando Gil:

What do you in relation to book? It is not important with you? Or just adding material when you require something to explain what you problem? How about your time? Or are you busy man? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Everyone has many questions above. They need to answer that question mainly because just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is appropriate. Because start from on guardería until university need this Physical Chemistry for Engineering and Applied Sciences to read.

Richard Hunt:

Reading can called thoughts hangout, why? Because when you are reading a book especially book entitled Physical Chemistry for Engineering and Applied Sciences your head will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging just about every word written in a publication then become one web form conclusion and explanation in which maybe you never get previous to. The Physical Chemistry for Engineering and Applied Sciences giving you one more experience more than blown away your thoughts but also giving you useful info for your better life on this era. So now let us present to you the relaxing pattern here is your body and mind will probably be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary wasting spare time activity?

Charles Howell:

Is it a person who having spare time subsequently spend it whole day through watching television programs or just laying on the bed? Do you need something totally new? This Physical Chemistry for Engineering and Applied Sciences can be the reply, oh how comes? A book you know. You are consequently out of date, spending your extra time by reading in this completely new era is common not a nerd activity. So what these textbooks have than the others?

Lynn Jordan:

On this era which is the greater man or woman or who has ability to do something more are more precious than other. Do you want to become one among it? It is just simple way to have that. What you should do is just spending your time almost no but quite enough to experience a look at some books. On the list of books in the top listing in your reading list is actually Physical Chemistry for Engineering and Applied Sciences. This book that is certainly qualified as The Hungry Slopes can get you closer in turning into precious person. By looking upward and review this publication you can get many advantages.
