Profiles of Drug Substances, Excipients and Related Methodology, Volume 32

Profiles of Drug Substances, Excipients and Related Methodology, Volume 32

Whilst following in the footsteps of previous volumes by presenting comprehensive reviews of drug substances and additional materials, this title also heralds a significant expansion of the scope of the series. Traditional contributions are now augmented by publication of critical review chapters that summarize information related to the characterization of drug substances and excipients. This change meets the needs of the pharmaceutical community and allows the development of a timely vehicle for publishing review materials on this topic. While offering comprehensive and specialised chapters, **Profiles of Drug Substances, Excipients and Related Methodology, Volume 32** also presents a methodology review article on the validation of chromatographic methods of analysis, as well as a summary of the publications in 2004 that dealt with polymorphism and solvatomorphism.

- * Presents comprehensive reviews covering all aspects of drug development and formulation of drugs
- * Now encompassing critical review chapters
- * Meets the information needs of the drug development community
