Ross Geoghegan

Topological Methods in Group Theory (Graduate Texts in Mathematics) Ross Geoghegan

This book is about the interplay between algebraic topology and the theory of infinite discrete groups. It is a hugely important contribution to the field of topological and geometric group theory, and is bound to become a standard reference in the field. To keep the length reasonable and the focus clear, the author assumes the reader knows or can easily learn the necessary algebra, but wants to see the topology done in detail. The central subject of the book is the theory of ends. Here the author adopts a new algebraic approach which is geometric in spirit.

From reader reviews:

Adelina Thompson:

Nowadays reading books be a little more than want or need but also turn into a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge your information inside the book which improve your knowledge and information. The info you get based on what kind of e-book you read, if you want attract knowledge just go with education books but if you want truly feel happy read one along with theme for entertaining like comic or novel. Typically the Topological Methods in Group Theory (Graduate Texts in Mathematics) is kind of guide which is giving the reader erratic experience.

Zachary Connors:

Reading a guide can be one of a lot of exercise that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new details. When you read a publication you will get new information since book is one of various ways to share the information or even their idea. Second, examining a book will make anyone more imaginative. When you looking at a book especially hype book the author will bring someone to imagine the story how the characters do it anything. Third, it is possible to share your knowledge to others. When you read this Topological Methods in Group Theory (Graduate Texts in Mathematics), you can tells your family, friends and also soon about yours e-book. Your knowledge can inspire the others, make them reading a publication.

Caitlin Cruz:

People live in this new moment of lifestyle always try to and must have the extra time or they will get lots of stress from both lifestyle and work. So , when we ask do people have extra time, we will say absolutely sure. People is human not really a huge robot. Then we inquire again, what kind of activity are there when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading guides. It can be your alternative inside spending your spare time, the book you have read is definitely Topological Methods in Group Theory (Graduate Texts in Mathematics).

William Black:

As a pupil exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some e-book, they are complained. Just small students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring along with can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Topological Methods in Group Theory (Graduate Texts in Mathematics) can make you really feel more interested to read.
