Lymphoid Organogenesis: Proceedings of the Workshop Held at the Basel Institute for Immunology 5th-6th November 1999 (Current Topics in Microbiology and Immunology) Fritz Melchers

It has been clear for a long time that after transplantation of a lymphoid organ, hematopoietic stem cells can regenerate the compartments of the organ, provided that the rest of its architecture - the stroma, the epithelia and the vessels - is intact. Ahead lies the even greater challenge to assemble also these other architectural elements of a lymphoid organ by transplanting stem cells. The workshop on lymphoid organogenesis was convened to review current knowledge of and experimental skills involved in this grand project to build a lymphoid organ from its individual cellular components.
