**Music Emotion Recognition (Multimedia Computing, Communication and Intelligence)** Yi-Hsuan Yang, Homer H. Chen

Providing a complete review of existing work in music emotion developed in psychology and engineering, **Music Emotion Recognition** explains how to account for the subjective nature of emotion perception in the development of automatic music emotion recognition (MER) systems. Among the first publications dedicated to automatic MER, it begins with a comprehensive introduction to the essential aspects of MER—including background, key techniques, and applications.

This ground-breaking reference examines emotion from a dimensional perspective. It defines emotions in music as points in a 2D plane in terms of two of the most fundamental emotion dimensions according to psychologists—valence and arousal. The authors present a computational framework that generalizes emotion recognition from the categorical domain to real-valued 2D space. They also:

- Introduce novel emotion-based music retrieval and organization methods
- Describe a ranking-base emotion annotation and model training method
- Present methods that integrate information extracted from lyrics, chord sequence, and genre metadata for improved accuracy
- Consider an emotion-based music retrieval system that is particularly useful for mobile devices

The book details techniques for addressing the issues related to: the ambiguity and granularity of emotion description, heavy cognitive load of emotion annotation, subjectivity of emotion perception, and the semantic gap between low-level audio signal and high-level emotion perception. Complete with more than 360 useful references, 12 example MATLAB® codes, and a listing of key abbreviations and acronyms, this cutting-edge guide supplies the technical understanding and tools needed to develop your own automatic MER system based on the automatic recognition model.

### **From reader reviews:**

#### **Steve Diaz:**

Spent a free time to be fun activity to complete! A lot of people spent their leisure time with their family, or all their friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? May be reading a book is usually option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the guide untitled Music Emotion Recognition (Multimedia Computing, Communication and Intelligence) can be fine book to read. May be it can be best activity to you.

#### **Kenneth Clark:**

Does one one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't ascertain book by its cover may doesn't work the following is difficult job because you are frightened that the inside maybe not because fantastic as in the outside look likes. Maybe you answer is usually Music Emotion Recognition (Multimedia Computing, Communication and Intelligence) why because the excellent cover that make you consider with regards to the content will not disappoint an individual. The inside or content is usually fantastic as the outside or cover. Your reading 6th sense will directly guide you to pick up this book.

#### **Colton Fierros:**

This Music Emotion Recognition (Multimedia Computing, Communication and Intelligence) is great e-book for you because the content that is certainly full of information for you who also always deal with world and also have to make decision every minute. This kind of book reveal it details accurately using great plan word or we can say no rambling sentences inside. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with wonderful delivering sentences. Having Music Emotion Recognition (Multimedia Computing, Communication and Intelligence) in your hand like having the world in your arm, info in it is not ridiculous just one. We can say that no book that offer you world with ten or fifteen minute right but this guide already do that. So , this can be good reading book. Hey there Mr. and Mrs. hectic do you still doubt this?

#### **Matthew Russell:**

In this era which is the greater man or woman or who has ability to do something more are more treasured than other. Do you want to become one among it? It is just simple approach to have that. What you must do is just spending your time not very much but quite enough to possess a look at some books. One of many books in the top collection in your reading list is Music Emotion Recognition (Multimedia Computing, Communication and Intelligence). This book which can be qualified as The Hungry Hills can get you closer in getting precious person. By looking upward and review this e-book you can get many advantages.
