Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science)

Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science)

Biometrics: Personal Identification in Networked Society is a comprehensive and accessible source of state-of-the-art information on all existing and emerging biometrics: the science of automatically identifying individuals based on their physiological or behavior characteristics. In particular, the book covers:

- *General principles and ideas of designing biometric-based systems and their underlying tradeoffs
- *Identification of important issues in the evaluation of biometrics-based systems
- *Integration of biometric cues, and the integration of biometrics with other existing technologies
- *Assessment of the capabilities and limitations of different biometrics
- *The comprehensive examination of biometric methods in commercial use and in research development
- *Exploration of some of the numerous privacy and security implications of biometrics.

Also included are chapters on face and eye identification, speaker recognition, networking, and other timely technology-related issues. All chapters are written by leading internationally recognized experts from academia and industry.

Biometrics: Personal Identification in Networked Society is an invaluable work for scientists, engineers, application developers, systems integrators, and others working in biometrics.

From reader reviews:

Stephanie Rodriguez:

Here thing why that Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) are different and trustworthy to be yours. First of all studying a book is good nevertheless it depends in the content of computer which is the content is as yummy as food or not. Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) giving you information deeper since different ways, you can find any book out there but there is no book that similar with Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science). It gives you thrill reading journey, its open up your own personal eyes about the thing in which happened in the world which is perhaps can be happened around you. You can easily bring everywhere like in playground, café, or even in your means home by train. If you are having difficulties in bringing the branded book maybe the form of Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) in e-book can be your alternate.

Charlie Bowers:

The book untitled Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) is the book that recommended to you to learn. You can see the quality of the publication content that will be shown to an individual. The language that publisher use to explained their ideas are easily to understand. The article writer was did a lot of study when write the book, so the information that they share to you personally is absolutely accurate. You also could get the e-book of Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) from the publisher to make you a lot more enjoy free time.

Wilma Bates:

Reading a book to get new life style in this year; every people loves to read a book. When you study a book you can get a large amount of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, along with soon. The Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) provide you with new experience in examining a book.

Dennis Jenkins:

As we know that book is significant thing to add our knowledge for everything. By a book we can know everything we want. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This guide Biometrics: Personal Identification in Networked Society (The Springer

International Series in Engineering and Computer Science) was filled about science. Spend your free time to add your knowledge about your scientific disciplines competence. Some people has several feel when they reading a book. If you know how big benefit from a book, you can really feel enjoy to read a book. In the modern era like now, many ways to get book that you wanted.
