Metapopulation Ecology (Oxford Series in Ecology and Evolution)

Ilkka Hanski

Metapopulation Ecology (Oxford Series in Ecology and Evolution) Ilkka Hanski

Written by a world renowned biologist, this volume offers a comprehensive synthesis of current research in this rapidly expanding area of population biology. It covers both the essential theory and a wide range of empirical studies, including the author's groundbreaking work on the Glanville fritillary butterfly. It also includes practical applications to conservation biology. The book describes theoretical models for metapopulation dynamics in highly fragmented landscapes and emphasizes spatially realistic models. It presents the incidence function model and includes several detailed examples of its application. Accessible to advanced undergraduate and graduate students, *Metapopulation Ecology* will be a valuable resource for researchers in population biology, conservation biology, and landscape ecology.
