FRAM: The Functional Resonance Analysis Method: Modelling Complex Socio-technical Systems Erik Hollnagel

Since the first book was published in 2006, resilience engineering has consistently argued that safety is more than the absence of failures. Several book chapters and papers have illustrated the advantage in going behind 'human error' and beyond the failure concept, and various complicated accidents have accentuated the need for it. But there has not yet been a comprehensive method for doing so; the Functional Resonance Analysis Method (FRAM) fulfils that need. Whereas commonly used methods explain events by interpreting them in terms of an already existing model, the FRAM is used to produce a model of what is needed for everyday performance to go right. This can then be applied to explain specific events, by showing how functions can be coupled and how the variability of everyday performance sometimes may produce unexpected and out-of-scale outcomes - either good or bad. The FRAM is based on four principles: equivalence of failures and successes, approximate adjustments, emergence, and functional resonance. Since the FRAM is a method rather than a model, it makes no assumptions about how the system under investigation is structured or organised, nor about possible causes and cause-effect relations. Instead of looking for specific failures and malfunctions, the FRAM explains outcomes in terms of functional coupling and resonance. This book presents a detailed and tested method that can be used to model how complex and dynamic socio-technical systems work, and understand both why things sometimes go wrong but also why they normally succeed.

From reader reviews:

Hazel Park:

What do you with regards to book? It is not important along? Or just adding material when you require something to explain what you problem? How about your spare time? Or are you busy person? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have spare time? What did you do? Everyone has many questions above. They must answer that question mainly because just their can do this. It said that about e-book. Book is familiar in each person. Yes, it is correct. Because start from on pre-school until university need this FRAM: The Functional Resonance Analysis Method: Modelling Complex Socio-technical Systems to read.

Kevin Vargas:

Playing with family inside a park, coming to see the ocean world or hanging out with pals is thing that usually you will have done when you have spare time, and then why you don't try issue that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love FRAM: The Functional Resonance Analysis Method: Modelling Complex Socio-technical Systems, you may enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh can occur its mind hangout people. What? Still don't understand it, oh come on its named reading friends.

Cheryl Ruiz:

This FRAM: The Functional Resonance Analysis Method: Modelling Complex Socio-technical Systems is new way for you who has intense curiosity to look for some information since it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know or perhaps you who still having little digest in reading this FRAM: The Functional Resonance Analysis Method: Modelling Complex Socio-technical Systems can be the light food for yourself because the information inside this particular book is easy to get by anyone. These books build itself in the form that is certainly reachable by anyone, yes I mean in the e-book application form. People who think that in e-book form make them feel tired even dizzy this reserve is the answer. So there is not any in reading a reserve especially this one. You can find what you are looking for. It should be here for a person. So , don't miss the idea! Just read this e-book variety for your better life in addition to knowledge.

Anne Shivers:

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information from the book. Book is written or printed or descriptive from each source which filled update of news. In this modern era like right now, many ways to get information are available for a person. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just looking
