Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO₂ Increase

Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO₂ Increase

A Practical, Get-Your-Hands-in-the-Soil Manual

Global climate change, increasing pollution, and continued rapid population growth is wreaking havoc on the planet. Stabilizing the environment at safe levels requires a large-scale restoration of damaged ecosystems. **Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO₂ Increase** outlines the basic concepts of geotherapy and highlights the importance of healing the biosphere's ability to store soil carbon to prevent climate change impacts. Facing challenges head on, it addresses how and why policymakers have underestimated the long-term impacts of climate change and how we can correct the flawed carbon management mechanisms today. The book also factors in where carbon can be most effectively stored, how quickly that can be done, and the practical and policy actions needed to get there.

This text presents innovative new technologies for restoring the most productive ecosystems on land while maintaining high biodiversity. It addresses processes and techniques of soil carbon restoration through biogeochemical cycling, biochar, slow-release fertilizers, weathering of minerals (olivine) and rock (basalt) powders, amendments and bio-fertilizers, and the establishment of vetiver and other perennials. Written by highly recognized professionals from every continent except Antarctica, this extensive work consists of 34 chapters covering issues that include: field experiences with biochar including a history of its research; practical uses of biochar in farming systems and the use of biochar for soil fertility enhancement; the potential of remineralization as a global movement; seawater concentrate for abundant agriculture; superior food production using sea salt and plant extracts; recycling waste nutrients using biochar and limestone; and commercially viable carbon farming. The book concludes with a chapter providing general thoughts on greening the earth and averting a global crisis.

Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO₂ Increase is an encyclopedia of ideas providing the tools needed for anyone involved with the ecological restoration and transformation of the planet.

From reader reviews:

Stephen Hancock:

The book Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase gives you the sense of being enjoy for your spare time. You can use to make your capable a lot more increase. Book can to become your best friend when you getting tension or having big problem using your subject. If you can make examining a book Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase to get your habit, you can get more advantages, like add your capable, increase your knowledge about some or all subjects. You may know everything if you like open and read a e-book Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase. Kinds of book are several. It means that, science guide or encyclopedia or some others. So , how do you think about this reserve?

Mark Nixon:

Do you certainly one of people who can't read enjoyable if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase book is readable by you who hate the straight word style. You will find the info here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to supply to you. The writer regarding Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase content conveys objective easily to understand by many individuals. The printed and e-book are not different in the articles but it just different in the form of it. So , do you even now thinking Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase is not loveable to be your top list reading book?

Jeffrey Price:

Hey guys, do you wants to finds a new book to study? May be the book with the title Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase suitable to you? The particular book was written by well-known writer in this era. The book untitled Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase is the main one of several books that everyone read now. This kind of book was inspired a number of people in the world. When you read this e-book you will enter the new way of measuring that you ever know ahead of. The author explained their thought in the simple way, thus all of people can easily to know the core of this guide. This book will give you a large amount of information about this world now. In order to see the represented of the world with this book.

Herbert Gist:

With this era which is the greater particular person or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple solution to have that. What you need

to do is just spending your time not very much but quite enough to possess a look at some books. Among the books in the top listing in your reading list is usually Geotherapy: Innovative Methods of Soil Fertility Restoration, Carbon Sequestration, and Reversing CO2 Increase. This book that is qualified as The Hungry Hills can get you closer in growing to be precious person. By looking up and review this publication you can get many advantages.
