Heat Transfer

Adrian Bejan

Heat Transfer Adrian Bejan

Relates introductory heat transfer concepts to other disciplines, namely thermodynamics and fluid mechanics. Reflects changes currently taking place in the research community as well as engineering education. Emphasizes that real applications tend to be interdisciplinary and require a solid foundation in all areas of the thermal sciences. Emphasizes design, or the synthesizing of two or more issues into an answer with practical meaning. Design questions are drawn from many diverse areas and each question is presented in a fundamental way. Makes a strong case regarding the use of simple and approximate analyses, focusing on order-of-magnitude calculations or "scale analysis". Applications are interdisciplinary.
