This brings the relationship between unemployment and the welfare state to the fore. On closer inspection, however, the matter appears to be much more complicated than the transatlantic contrast suggests. Consider only that the welfare state and what is called "social policy" have a long tradition in Europe. They obviously did not prevent or noticeably hamper the decline in unemployment in the 1950s and the emergence of full employment in the 1960s. This leaves room for various conjectures. Does the welfare state matter only after a long time lag or after it has grown too fast or too much beyond a critical size? Is it the welfare state per se that is harmful to employment or do its harmful effects arise only under certain conditions, e. g.
